502-473-1256 or by email at Info@LDAofKY.org**

Come on a journey that explores what it has been like for an individual who was diagnosed with a learning disability (LD) in grade one. Brenda will discuss the importance of early identification of LD, the importance for teachers to understand the grieving process for the parents and the student, and free resources available to teachers and parents, You will also see the value of assistive technology and the tools you need to know about and local support systems.

Brenda McBride comes to us from Regina, Saskatchewan, Canada and she is one of North America's preeminent experts on assistive technology. She is also a person who uses assistive technology to address her learning disability. Since the emergence of assistive technology more than 15 years ago, it has become an intricate part of her life. She has worked ten years with adults, children and professionals within the learning disability community, overseeing the office and development programs to help individuals who have fallen through the cracks. Brenda has been involved on the international, national, provincial and local levels to address the needs of individuals with disabilities. She has spoken at CSUN, ATIA, Closing the Gap, TRLD, IDA, LDAC, Springboard and LDA America etc. Brenda brings a wealth of personal and professional experience involving the world of learning disabilities. She shares her experiences with individuals she meets at conferences, presentations, webinars and workshops. She will also share how, as an adult, she uses technology to accommodate her own learning difficulties.
